Certified Data Destruction and Secure Equipment Disposition

Secure Solutions that yield Maximum Returns

- Satisfy regulatory compliance with certified data erasure and disposal
- Ensure secure redeployment, end-of-lease, resale, or disposal of IT equipment
- Capture maximum equity from your IT inventory with expert re-marketing
- Extend management and auditing capabilities with detailed web-based reporting

Whether managing the redeployment, end-of-lease, resale, or disposal of IT equipment, Certified Data Destruction is an essential measure in meeting regulatory compliance, mitigating liability, and protecting proprietary and intellectual property. In addition, the secure and effective re-marketing of retired equipment and components is a major factor in reducing total cost of ownership.

N-1 Certified Data Destruction and Secure Equipment Disposition is a fully-managed, certified, and economic solution for managing the life-cycle transitions of your IT assets.

Services Include

- On or Off-Site Processing
- Secure Collection, Shipping, and Warehousing
- Thorough Auditing Processes and Audit Reporting
- Data Erasure to meet or exceed Department of Defense Specifications
- Disk Degaussing and Shredding
- Web-based Inventory and Process Reporting
- Expert Re-marketing Services for Equipment and Components
- Environmentally Responsible Disposal
- Certificates of Data Destruction and Data Disposal

Certified Data Destruction and Secure Equipment Disposition

Fully Managed Solution

Whether providing Certified Data Destruction on-site or securing your equipment for removal and safe disposition, N-1 manages all phases of your equipment transition from end-to-end. We consult closely with you to identify the most economical disposition strategy to meet your security and compliance needs. We then schedule our IT professionals to conduct all necessary work in the most expedient and unobtrusive manner possible.

Each step of the N-1 equipment transition process is carefully managed and fully documented. You can track the progress of every component, from initial inventory to final disposition, with our web-based reporting tool. To ensure complete transparency and regulatory compliance N-1 provides comprehensive fair-market-value accounting, certificates of data destruction and data disposal, purchase orders, and detailed audit reports.

Certified Data Erasure and Disposal

Certified Data Erasure is necessary to ensure the redeployment, end-of-lease, resale or disposal of IT equipment is conducted in compliance with security and regulatory requirements. The N-1 proprietary data erasure process can be executed on or off-site and exceeds Department of Defense standards (1x, 3x, 5x, or 7x overwrite). Each piece of hardware is individually processed, audited, and tested and upon successful confirmation a Certificate of Data Destruction, necessary for compliance reporting, is issued.

Where highly-sensitive or end-of-life equipment is concerned N-1 utilizes extremely thorough destruction processes. These processes may include the degaussing and/or shredding of disks and components. Following complete destruction of materials a Certificate of Data Disposal is issued for compliance reporting purposes. N-1 disposes of all waste materials in an environmentally responsible manner in accordance with EPA guidelines.

All N-1 processes and reporting are fully compliant with the U.S. Patriot Act, Sarbanes-Oxley, HIPAA (Health Insurance Portability and Accountability Act), and GLBA (Gramm-Leach-Bliley Act).

Expert Re-Marketing Services

N-1 Technologies Re-Marketing services ensures a substantial amount of equity from your retired IT equipment is recaptured. N-1 has 20 years worth of IT market-making experience and will be able to successfully resell any and all valuable components of your legacy assets. We maximize the value of your retired inventory by reconstructing/upgrading equipment or breaking it down into component parts in order to capture the greatest possible total revenue. A fair market value is assigned to each asset and you will be able to off-set the costs of the services with shared proceeds generated from the sale of the equipment.

N-1 reports the fair market value of each piece of equipment and component in your comprehensive audit report. We also generate purchase orders for your accounting purposes.

N-1 Technologies is a leader in IT asset management with more than \$5 Billion in total managed assets over 20 years. N-1 provides solutions for the complete life-cycle of IT asset management, helping our clients to reduce costs, capture maximum asset equity, extend management capabilities, and enhance security and compliance measures.
